

CSCE 625
Programming Assignment #4

INSTRUCTIONS

There is a .cpp file named reso.cpp. It can be compiled in a Linux environment with g++ support. Once compiled, it generates an executable file that takes a .kb file as input. Both the example1.kb and sammys.kb files have been included in the zip.

Steps to solve for Sammy's Sport Shop problem:

```
$ g++ reso.cpp  
$ ./a.out sammys.kb
```

Steps to solve for example1.kb as given in the question:

```
$ g++ reso.cpp  
$ ./a.out example1.kb
```

For any queries please feel free to call or message me.
